## Finding Doubles Plus or Minus 1

## Materials:

\*Primary Number cards (cut out and store in a Ziploc baggie)

\*Finding Doubles to 20 game board

## Directions:

- 1. Player 1 turns over a number card and doubles it. (If you get a 2, then you think 2+2=4.) Player 1 decides if they want to add 1 or subtract 1 from the doubles sum.
- 2. Player 1 finds the answer on the game board and writes the number sentence above the answer (2+2+1 or 2+2-1).
- 3. Players take turns until all possible boxes have been filled. Notice which boxes aren't used. Why are these boxes empty?
- 4. If you choose a wildcard, you can pick the number you wish to double.

Variation: Players choose if they want to double the card, double and add 1, or double and subtract 1. The game is over when the entire board has been filled.

## Finding Doubles to 20

2	12	10	3.	
6	8		5	
9	13		4	6
	10	12		5
20	17		12	18
16	15	19	13	1.4
