

Guess My Rule with Polygons

1. One player thinks of a rule and without telling anyone the rule, puts two of the polygon cards that fit the rule on a piece of paper and one that does not fit off the paper.
 - a. SAMPLE RULES:
 - i. “has right angles”
 - ii. “Have sides that are all the same size”
2. The other players then choose polygons to place as “fits the rule” or “does not fit the rule.”
3. Once you think you know what the rule is, you can say you want to tell the rule.

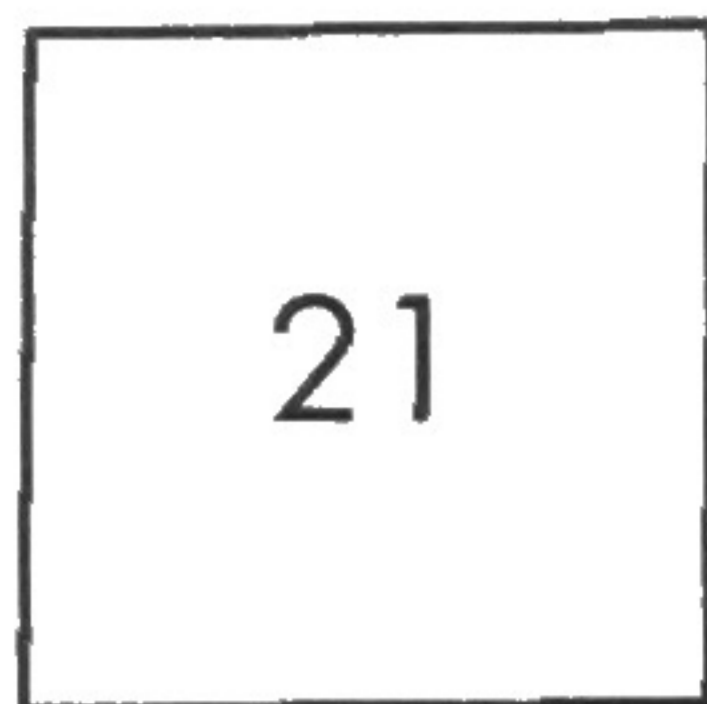

Modified Version

- The game can be modified to focus on rules of quadrilaterals. To do this, play with only quadrilateral polygon cards.
