# Place-Value Prowl

**Directions:** Choose a partner. Decide who will be the lion and who will be the leopard. Roll the die and write the number you roll in one of the six sections of your Round One box. Have your partner do the same. Continue taking turns—rolling the die and writing a number in a section of the gamebox—until the boxes in Round One are filled. Then compare the number you made with the one created by your partner. The player with the larger number wins that round. Play five rounds.

## Lion

### Materials:

one die

a copy of this reproducible for each pair of students

a pencil for each student

## Leopard
